Education

- **Ramrao Adik Institute of Technology** — Navi Mumbai, IN
  Bachelor of Technology in Computer Science (CGPA: 9.74) — *June 2022 – June 2026*

Experience

- **Weatherford** — Navi Mumbai, IN
  Research Development Engineer (Intern) — *June 2026 – Present*
  - **Protocol Modernization**: Migrating a real-time well-data service from WITSML 1.x to the ETP 2.1 standard in C# and .NET, replacing legacy SOAP/XML request-response polling with a WebSocket-based publish/subscribe transport.
  - **Real-Time Data Streaming**: Implementing Avro-encoded ETP message handlers and subscription channels over WebSockets, allowing clients to receive incremental well-log updates as they change instead of repeatedly fetching full documents.
- **Vector Consulting Group** — Thane, IN
  Software Development Engineer (Intern) — *January 2026 – May 2026*
  - **Workflow Automation**: Maintained a task management system using React.js and Bootstrap, optimizing client workflows for large companies and SMBs, reducing task completion time by 30%.
  - **Proof of Concepts**: Built rapid proof-of-concept prototypes that accelerated business decisions and set realistic expectations, improving client alignment on scope and timelines.
- **Vigovia** — Remote
  Software Development Engineer (Intern) — *August 2025 – December 2025*
  - **Digital Transformation**: Led frontend development for a travel booking platform, translating Figma designs into production interfaces that digitized 90% of offline operations and lifted user engagement by 25%.
  - **Backend Architecture**: Architected RESTful API endpoints in Go following SOLID principles and integrated PostHog analytics, raising user behavior tracking accuracy by 35% and cutting booking errors by 20%.

Projects

- **RemoteUpload (File Sharing Platform)**:
  - **Secure File Transfer**: Designed RemoteUpload, a secure file-sharing platform enabling cross-device access by uploading files to S3 and using Redis to map short codes (and QR codes) to URLs, eliminating direct PC logins.
  - **Responsive Interface**: Engineered a fully responsive interface with Next.js and Shadcn/UI, increasing user engagement by 40% across desktop and mobile.
- **MC Render (3D Rendering Platform)**:
  - **Web Application**: Developed MCRender, a high-performance web app for Minecraft player-model rendering using Three.js for 3D graphics, Next.js as the React framework, and Tailwind CSS for responsive layout.
  - **Scale and Performance**: Scaled the platform to 100,000+ unique visitors and 50,000+ renders while sustaining 20,000+ monthly active users.

Leadership & Activities

- **Hackathon Placements**: Reached finalist standing in the PIWOT Imagine Hackathon (top 2% of 15,000+ participants) and placed 6th in GDSC Hackaloud among 200+ teams.
- **Academic Research**: Authored a peer-reviewed paper accepted at Springer's BIDA conference, contributing novel insights recognized within the academic community.

Technical Skills

Languages: C#, Java, Python, JavaScript, SQL (Postgres), HTML/CSS
Frameworks: .NET, React, Next.js, Node.js, FastAPI, Flask, SvelteKit, ShadCN
Developer Tools: Git, Docker, WebSockets, Figma, Google Cloud Platform, PostHog, Vercel, Netlify
Databases: PostgreSQL, MongoDB, Redis
